**“Preventing, Recognizing & Treating Anaphylaxis in Dental Practice”  
Speaker - Dr. Randall Crowell**

Anaphylaxis is a life-threatening condition that dental professionals must be prepared to deal with in their work environment. What can we do to prevent this condition from presenting itself in our practice? If for some reason outside of our control, our patient experiences an anaphylactic reaction, what are the signs and symptoms that we will need to recognize? How will the patient be treated to reverse the reaction and support them until EMS arrives? Dr. Crowell has the answers to these and many more questions you might have about Anaphylaxis! Be prepared and be equipped to handle this emergency in your dental office. *CCP Links incl A-5-4 B-5 C-3-2 C-6-5 F-1-1*
